

# EXISTING GARDEN

# PRELIMINARY GOALS + OBJECTIVES

## 1. Create a cohesive framework, strong sense of place and renewed identity for the Garden

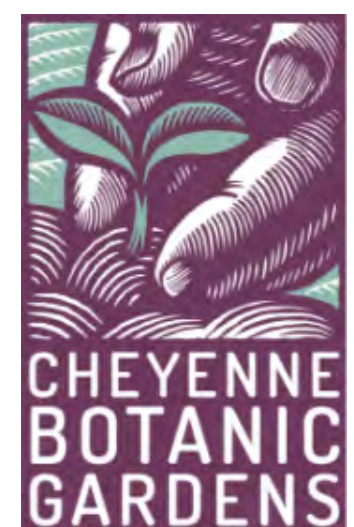

- Develop a clear and concise circulation pattern promoting ease of wayfinding to key destinations
- Establish clear edges and transitions between gardens
- Build on unified aesthetic and character with common design elements that connects the garden to the region
- Create an arrival experience that celebrates and acknowledges the garden
- Build upon current horticultural excellence

## 2. Create an inspirational place for learning, reflection and as an example to the community

- Promote and exemplify sustainability and sustainable garden practices
- Promote and exemplify water conservation garden principles
- Reflect Garden 'brand' and interpretation for visitors
- Continue to reveal local and regional history and historic garden assets
- Facilitate garden visitation and Membership increase through programming/design and community needs

## 3. Anticipate and design for effective, integrated garden expansion and/or renovations

- Determine key needs for facility expansion/renovation
- Establish clearly defined edges and plan for future security and/or boundary needs
- Consider and define maintenance needs for expansion/renovation
- Identify and plan for future revenue generation through integration of programming and garden design
